

Joshua Toback

Certified Full Stack Web Developer

joshuatobackdev@gmail.com | 919-830-8387 | Fuquay-Varina, NC
<https://www.linkedin.com/in/joshua-toback/> | <https://github.com/JoshuaToback> |
<https://joshuatoback.github.io/Programming-Portfolio/>

Full Stack web developer using background in cinema and television arts to write creative and innovative programs. Certificate in Full Stack web development earned from the University of North Carolina Chapel Hill Boot Camp. Imaginative problem solver who is driven to create a great team environment, build responsive websites, and ensure a proper project workflow.

Technical Skills

Frontend: HTML5, CSS, JQuery, Javascript, Bootstrap

Backend: MySQL, Express, ReactJS, Node, Handlebars, Inquirer

Projects

FullStacks Cafe

Project Manager / Front-End Developer

<https://github.com/JoshuaToback/FullStacks-Cafe> | <https://fullstackscafe.herokuapp.com/home.html>

- This is a full-stack application that on the front-end serves as a table-side menu that allows customers to create, edit, and place orders and check the total. The back end is for managers to check inventory and edit the menu and order history.
- Designed the core concept and databases, created the wireframing, formatted the HTML and MySQL database, and assigned tasks while maintaining clear communication with the development team.
- Tools/Languages: HTML5, CSS, JavaScript, Node, MySQL, Handlebars, Heroku

Drive Destination

Lead Developer / Planner

<https://github.com/JoshuaToback/Drive-Destination> | <https://joshuatoback.github.io/Drive-Destination/>

- This app displays how long it would take to get from one destination to another, with an interactive map and directions on how to get there.
- Responsible for wireframing and planning the app's functionality, displaying all stored data that was input, and debugging any formatting or syntax issues. Operated as the team leader, assigned roles and made sure communication was solid throughout the project.
- Tools/Languages: HTML5, CSS, JavaScript, Google Places API, Distance Matrix API

Code Quiz

Front-End Developer

<https://github.com/JoshuaToback/code-quiz> | <https://joshuatoback.github.io/code-quiz/>

- Using multiple choice questions, this app is a functional quiz that can store highscores for repeat attempts.
- This app utilizes localStorage and countdown to track user answers and scores, redirecting the user to a high-score page after their quiz is finished.
- Tools/Languages: HTML5, CSS, JavaScript

README Maker <https://github.com/JoshuaToback/README-Maker>

Back End Developer

- Using inquirer, this CLI application generates a markdown file for projects that need a README.md file.
- Existing entirely within the command line, a user could generate a README with detailed instructions, a table of contents, and a license that can be selected based on what is required.
- Tools/Languages: Node, Express, Inquirer

Education

University of North Carolina in Chapel Hill, Chapel Hill, NC
Certificate in Fullstack Web Development

March 2023

Elon University, Elon, NC
Bachelor's in Communications / Cinema and TV Arts

May 2020

Experience
